## International Fish Cannery

International Fish Cannery (Scotland) Ltd (IFC) was established in 1979 and is the largest manufacturer of canned seafood in the UK. At their factory in Fraserburgh, on the North East coast of Scotland, the company employ around 200 personnel who process many millions of canned seafood products every year. Over 60% of the company's sales are exported to Europe, USA, Australia and South Africa. Whilst in their home market IFC supplies the leading distributor John West Foods, as well as the major retailers.

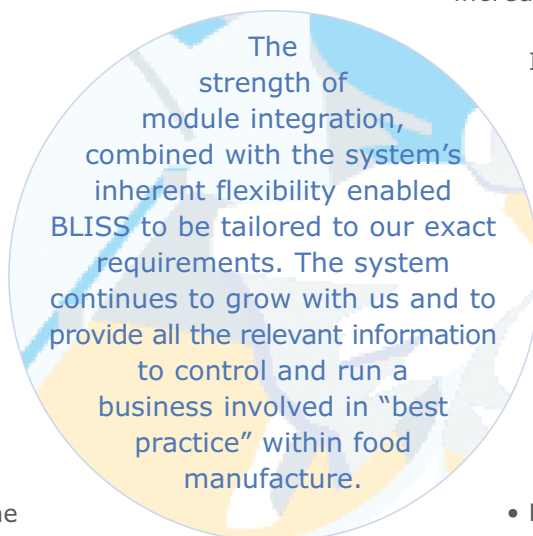

IFC used Ernst & Young consultancy to review several solutions that best fitted the company's needs and finally selected Drive computing's ERP application BLISS in 1992. The main reason for final selection being the package provided an integrated business solution that covered all areas of their business from manufacturing and stock control to sales, purchasing, production planning and finally through to accounts.

Jim Strachan says "The strength of module integration, combined with the system's inherent flexibility enabled BLISS to be tailored to our exact requirements. We have seen tremendous growth and change in our market sector over the last few years and required a system to meet these and future legislative demands. The system continues to grow with us and to provide all the relevant information to control and run a business involved in "best practice" within food manufacture.

If you would like to know more about how a recipe of strong partnership, specialised software and innovative management could help you please contact us for a FREE initial consultation.

Drive Computer Services was formed in 1983 to provide computer systems and consultancy to the process industry. Today, the company is a systems supplier providing solutions to its key manufacturing market sectors of Foods, Chemicals, Pharmaceuticals, Blending, and Lubricants.

BLISS is the original integrated manufacturing management system for the process industry. It provides a complete solution for companies operating in highly competitive markets that need to be responsive to their customers and meet increasing legislative demands.

In many aspects of life the original idea is often the best. This is so with BLISS, the resource planning solution designed and developed by Drive Computer Services specifically for the process industry.

Since the early 1980's BLISS has been helping process companies meet key business objectives such as:

- Maintaining competitive edge
- Improving customer service
- Enhancing product quality
- Protecting investment

Many famous world-wide brand manufacturers use BLISS as the profit catalyst to control and maintain the quality and excellence of the products and services for which they are renowned.

**BLISS is "the name behind the names"**
